Software Engineer

PROFESSIONAL SUMMARY

Software Engineering student at Ain Shams University (CHP double degree with the University of East London, 3.7 CGPA) with an ISTQB Foundation Level certification and hands-on experience across software development, quality assurance, and automation scripting. Built academic and freelance projects spanning Python, Java, and JavaFX, and gained professional QA experience validating web platforms during an internship at Digital Blocks. Comfortable collaborating within Agile teams and learning new technologies quickly.

CORE SKILLS

Software Engineering: Python, Java, C#, C++, JavaScript (ES6+), SQL (Oracle/MySQL), Object-Oriented Programming (OOP), Data Structures & Algorithms, MVC Architecture

Quality Assurance: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Test Case Design, Defect Reporting, Agile (SCRUM/Kanban)

Web, Databases & Tools: HTML5, CSS3, RESTful APIs, Google Apps Script, MySQL, Oracle Database, Supabase (PostgreSQL), Git/GitHub, VS Code

PROFESSIONAL EXPERIENCE

Software Quality Assurance Intern

May 2025 – Aug 2025

Digital Blocks — Cairo, Egypt

- Applied manual testing techniques to validate website functionality and user workflows.
- Designed and executed 50+ functional test cases covering authentication, navigation, and core platform features.
- Identified and documented software defects with detailed reproduction steps and collaborated with developers to verify fixes.
- Participated in Agile sprint discussions and testing activities throughout the development lifecycle.

Co-Founder & Lead Developer

Mar 2026 – Present

Everly Digital — Cairo, Egypt

- Develop responsive web applications using HTML, CSS, and JavaScript.
- Perform cross-browser compatibility testing and responsive layout verification.
- Integrate Google Apps Script APIs with frontend applications and validate JSON data structures.

Freelance Graphic Designer & UI Illustrator

Jan 2024 – Present

Self-Employed — Cairo, Egypt

- Design branding assets, user interface mockups, and marketing materials for local businesses.

PROJECTS

Papers Filter System & Automated PDF Parser (Python, Node.js, Supabase)

- Built automation scripts to scan directories, parse PDF metadata, and organize examination documents.
- Developed a Supabase-backed student registration system with secure Row-Level Security policies.
- Implemented backend validation logic and automated data processing workflows.

Xbox 360 Controller Drift Corrector (Python)

- Developed a Python application to calibrate joystick deadzones and validate controller input accuracy.
- Implemented precise timing mechanisms using the Windows multimedia API for stable input processing.

Food Ordering Management System (Java, JavaFX, MySQL)

- Designed and developed a desktop food ordering application following Object-Oriented Programming principles.
- Integrated MySQL for user authentication and order management.
- Verified data integrity through SQL validation and application testing.

Course Registration System (C++ & Qt)

- Developed a desktop course registration system implementing prerequisite validation and scheduling logic.

EDUCATION

Bachelor of Science in Software Engineering (CHP Double Degree with University of East London) Expected 2027

Ain Shams University, Cairo, Egypt — Current CGPA: 3.7 / 4.0 (Excellent Standing)

CERTIFICATIONS & COURSES

Certifications

- ISTQB Certified Tester (Foundation Level)
- Microsoft Certified: Azure AI Fundamentals (AI-900)
- SQL Advanced Certificate — HackerRank
- IELTS Academic — Overall Band 7.0

LANGUAGES

Arabic: Native / Mother Tongue

English: Professional (IELTS Academic 7.0)
