OBJECTIVE

- Software Engineering student with strong foundations in development and quality assurance. Experienced in test case design, bug reporting, and building desktop applications with C++, C#, and Java. Seeking opportunities to apply both QA and development skills in real-world projects. Great passion for game development and designing.

EDUCATION

Ain Shams University, CHP Double Degree with University of East London | 2023–2027 (Expected)

Software Engineering Major

- Current CGPA : 3.8 (A – Excellent Standing)

TECHNICAL SKILLS

- Frameworks & Tools: Qt, Windows Forms, JavaFX, SFML, Oracle SQL, MySQL
- Data Analysis & ML: Python (pandas, scikit-learn), Matplotlib, Regression, Classification, Clustering, Charting, Histograms
- UI/UX Development: GUI design, modern graphical interfaces, user-focused desktop applications
- Version Control & Dev Tools: Git, GitHub, Visual Studio, VSC.
- Databases, PL/SQL, Data analysis.
- Data Structures and algorithms, Object-Oriented Programming, Operating System.

SOFT SKILLS

- Fast Learner: Quickly adapts to new tools, technologies, and challenges
- Problem Solving: Excellent at debugging and identifying code issues rapidly
- Creativity & Design Thinking: Combines logic with visual design in UI/UX work
- Team Collaboration: Experience working on group projects with defined roles
- Attention to Detail: Strong focus on clean code, usability, and efficiency
- Excellent English Proficiency

PROGRAMMING LANGUAGES

- C++, C#, Java, Python, Ada, Lua, GDScript

EXPERIENCE

**Software Quality Assurance and tester
(Digital Blocks) | 2025**

- Applied ISTQB principles in real-world project scenarios
- Designed and executed detailed test cases for an e-commerce website (Amazon-like)
- Reported and tracked bugs to ensure smooth user experience and product reliability

PROJECTS

Food Ordering Management System | 2025 – 2026

- Technologies: Java, JavaFX, MySQL
- Built a GUI-based application for managing food orders in a restaurant setting. Features include menu display, order placement, and administrative controls for updating menu items and processing orders. Used CRUD operation to an SQL-based database.

Course Registration System | 2025 – 2025

- Technologies: C++, Qt Framework
- Developed a desktop application enabling students to register for courses, view grades, and manage academic schedules. Implemented features such as prerequisite checks and file-based data persistence to ensure a seamless user experience.

Uber Ride Booking System | 2024–2025

- Technologies: C#, Windows Forms, Oracle SQL
- Built a desktop ride-hailing system inspired by Uber. Implemented user and driver authentication, ride booking, payment processing, and rating functionalities. Utilized stored procedures to manage driver balances and retrieve completed rides. Designed intuitive UI and structured a normalized Oracle database with full CRUD support.

CERTIFICATES

- Microsoft Certified: Azure AI Fundamentals (AI-900) – Microsoft
- IELTS Academic – Score: 7.0 (English Proficiency)
- SQL (Advanced) Certified on from hackerrank.com
- Android development (Ain Shams university)
- Effective test case and bug report writing techniques (Information Technology institute)
- ISTQB® Foundation Level (Information Technology institute)
- Introduction to software testing concepts and techniques (Information Technology institute)
- Quality assurance and control (Digital Blocks)
